INFO-TECH CITROËN Racing C2 R2 and C2 R2 MAX N° 28/10.

Subject: Doors Lightening.

Dear customers,

If your C2 R2 or C2 R2MAX is not yet equipped with the light doors option, we propose you to proceed by yourself to the lightening of your doors (in accordance with the homologation form A-5672 extension 26/12 VO).

This lightening offers a saving of 13.9 kg per door and can be extended by the use of the WRC type door seal reference 3W2A62267A (1 kg per door).

IMPORTANT: We remind you that, following the rules, the homologated lightening of the doors **COMPULSORILY** requires the use of the F.I.A. homologated door panels reference 3X4A62862B for the right panel and 3X4A62863B for the left one (in accordance with the homologation form A-5672 extension 12/05 VO).

To realise this lightening, unsolder and remove from the door the elements in red on the following picture:

F.I.A. Panel

Nota: In case of deterioration of your external panel during this operation, this one is available in the spare part network under the reference 9009E0 for the left panel and 9010E5 for the right one.

Thank you for your attention.
