INFO-TECH CITROËN Racing C2 R2 and C2 R2 MAX N° 25/10.

Subject : Front and Rear axle, wheel studs.

Dear Customers,

We ask you to pay attention about the using and the maintenance of your C2R2 or C2R2 MAX wheel studs.

- Pay attention to apply some copper grease on threads, wheel side.
- The torque of the wheel nuts has to be, in cold or hot condition, 10 m.kg.
- The contact surfaces between rim / disc (or wheel spacer) and disc / hub has to be always clean and plane. It means no corrosion, impact, bump, etc...
- A went off or a crash causing a rim breaking or damaging a front or a rear axle component mean automatically a wheel studs replacement.
- Except a crash, twisting or a went off, all studs have to replaced to a mileage of 4800 kms maximum (stages + tests).

Nota : we remind you that all assembly informations are brought together in the C2 R2 MAX notice sheet. You can download it by the following link :
