**POWER STEERING ECU ASSEMBLY****!!!**

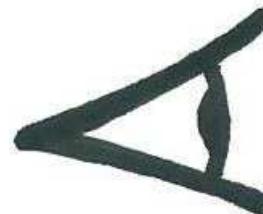

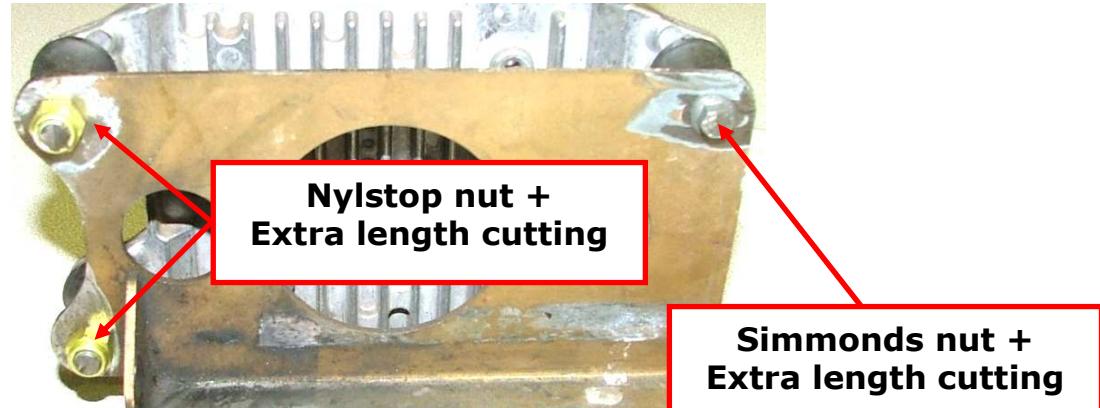

**The power steering ECU needs to be vibration protected. Please follow instructions below to assemble it flexible.**

**A**

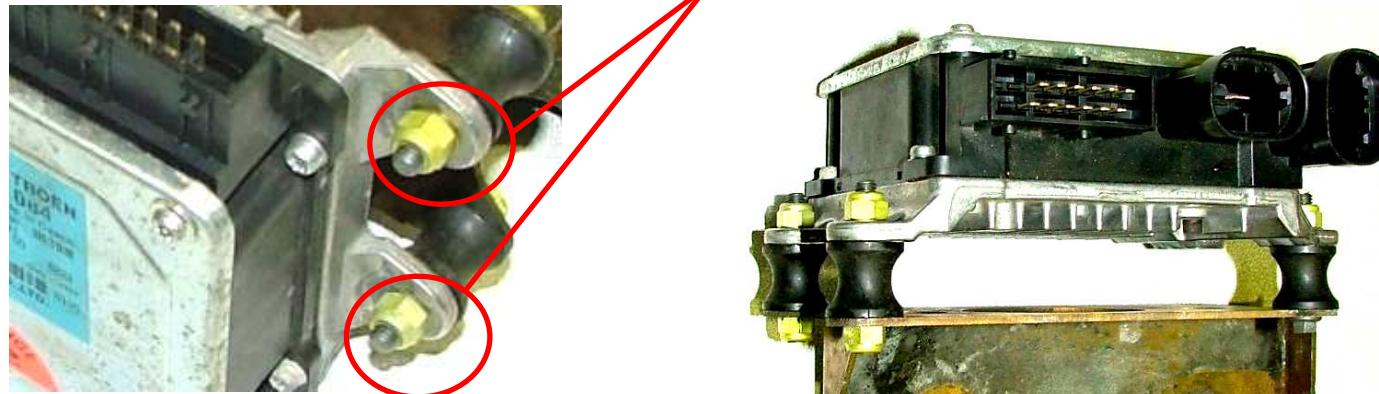

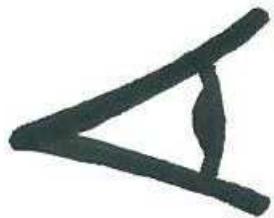

Assembly silent blocks (ref 2) on the bracket. Use 2 M6 nylstop nuts for outside, and 1 M6 simmonds for the silent block inside battery bracket (like shown on picture below).

Cut the extra length of each silent block.

**M6 Self locking nut and D6x12x0.6 onduflex washers**

Apply one or two coats of 3M protection tape on rectangular connector, for wires close to the master cylinder.

**Wire protection with  
3M protection tape.**
